

## TC, TENSION CLAMP

TC tension clamps are applicable to four-core self-supporting low voltage aerial cables. These clamps are used for anchoring and tightening insulated conductors.

- Iron braces are made of steel strap with surface galvanized.
- Wedges are made of weather resistant and anti-UV material with high mechanical strength.
- Equipped with bolts.
- Strong springs between wedges facilitate the insertion of conductors.
- No loose parts could fall off during installation.

Type	Conductor Size (mm <sup>2</sup> )	Cable Diameter(mm)	Failure Load(kN)	Pack (pcs)
TC16-50/4	16-50	7-12	14.4	18
TC70-95/4	70-95	13-15.7	27.4	12
TC95-150/4	95-150	14.2-18.6	43.2	12
*TC50-120/4	50-120	10.8-16.7	20	12

Note: \*TC50-120/4 is equipped with shear head bolts.
